ABOUT

Registered Architect in Costa Rica and multidisciplinary designer with 12+ years of experience across architecture, experiential design, interactive media, and design technology.

At RoTo Architects, I work across the full project life cycle - from concept and design development through documentation, permitting, bidding, and construction administration - within a small studio where multidisciplinary responsibility is essential.

My work combines architectural delivery with immersive media and computational tools, with a focus on solving project-specific design and production problems.

PARAMETRIC

EXPERIENCE

ROTO ARCHITECTS | 2022-PRESENT

PROJECT ARCHITECT / DESIGNER

Los Angeles, California

- Lead and contribute to projects from early concept and schematic design through design development, construction documents, permitting, bidding support, and construction administration.
- Produce coordinated architectural drawing packages, technical details, models, presentations, and design studies using Revit, Rhino, AutoCAD, and Adobe workflows.
- Coordinate directly with clients, structural and MEP consultants, contractors, specialty vendors, and fabricators; resolve design and construction issues while maintaining design intent.
- Manage construction phase work including RFIs, submittal review, field coordination, design revisions, contractor communication, and coordination of project changes.
- Work within a small studio structure that requires fluid movement between architectural design, documentation, project coordination, visualization, permitting, and construction responsibilities.
- Initiate project-specific computational and AI-assisted workflows to address planning, environmental analysis, interoperability, and documentation challenges.

GENSLER - NEWPORT BEACH | 2018-2021

TECHNICAL DESIGNER

Newport Beach, California

- Developed design-development and construction-documentation packages for 200+ workplace and amenity projects, including offices, elevator lobbies, fitness centers, conference centers, and restrooms for a major Southern California real estate client.
- Collaborated with Gensler Los Angeles Brand Design on wayfinding construction plans, technical elevations, and environmental graphics documentation.
- Served as a digital design resource for BIM, Rhino, and Grasshopper problem solving across the studio; supported delivery of The Irvine Company Workspace Flex+ program.
- Designed and produced interactive graphics and projection-mapping experiences for Gensler events, extending architectural work into immersive media.

GENSLER - COSTA RICA | 2015-2018

ARCHITECT / PROJECT MANAGER

San Jose, Costa Rica

- Managed concept, schematic design, and design development for 300+ automotive retail projects for General Motors, Buick, Cadillac, Toyota, and Nissan across U.S. markets.
- Provided BIM support and collaborated with Gensler Los Angeles Brand Design on wayfinding and technical documentation.
- Developed 3D-printed housing and office prototypes in collaboration with the Gensler Chicago office.
- Led experimental interactive work including projection mapping, responsive wayfinding, and a sensor-triggered interactive staircase.

EARLIER EXPERIENCE

Proarinsa Costa Rica - Architect Assistant (2014-2015) | George Tile Costa Rica - Tile Contractor / Site Management (2011-2012)

EXPERIENTIAL + IMMERSIVE COLLABORATIONS

RABCUP | FREELANCE COLLABORATION

EXPERIENTIAL / ARCHITECTURAL DESIGNER

- Design and construction documentation for experiential environments and interactive custom features, including interactive tables and walls for trade show installations.
- Architectural redesign work for the Griffith Park Visitor Center, connecting visitor experience, spatial design, and technical documentation.

YKL | FREELANCE COLLABORATION

IMMERSIVE / TECHNICAL DESIGNER

- Crunchyroll immersive experience setup and programming of interactive and media-based experience systems.
- Peacock immersive theater experience at the Stanley Hotel - programming and technical execution of coordinated visual and sound effects for a theatrical haunted-house environment.
- Contributed to multiple projection-mapping projects, combining spatial design, media setup, mapping, playback, and onsite execution.

P.A_L

Patrick Aguilar Liriano

CORE CAPABILITIES

- Architectural Design
- Construction Documentation
- Construction Administration
- Experiential / Exhibition Design
- BIM + Revit Delivery
- Rhino + Computational Design
- Interactive Media Integration
- Wayfinding + Environmental Graphics
- Fabrication / Vendor Coordination
- Projection Mapping
- Generative Design Workflows
- AI-Assisted Tool Development

EDUCATION

UNIVERSIDAD VERITAS

Costa Rica | 2013

Bachelor of Architecture

U.S. degree homologation

Registered Architect - Costa Rica

SELECTED TALKS

Digital / Interactive Media

Universidad Tecnológico | 2017

Digital Tools + Storytelling

Universidad Veritas

RECOGNITION

Honor Mention - LL-TOPO: Alter Ego

Recycled-tire green topography / urban furniture | 2018

DESIGN TECHNOLOGY + INDEPENDENT R&D

Generative Test-Fit Tool | AI / REINFORCEMENT LEARNING

Developed a project-specific generative planning tool that rearranges predetermined residential unit layouts across a site according to architectural rules and performance criteria, allowing rapid comparison of multiple planning configurations.

Project-Specific Climate Analysis Tool | SOLAR / SHADOW / WIND

Developed an environmental design tool combining site-specific solar, shadow, and wind analysis to support early design decisions and make climate information spatially legible for architectural teams.

Open-Source Rhino - Revit Bridge | BIM INTEROPERABILITY

Developing a workflow that converts Rhino geometry into native Revit architectural elements, including walls, floors, and roofs, to improve interoperability between free-form design and BIM documentation.

SELECTED INTERACTIVE + SPATIAL MEDIA WORK

StoryTeller Machine | MATCHBOX GALLERY 2022 | DOME FEST WEST 2024

Interactive AI storytelling installation combining speech recognition with Stable Diffusion image generation. Spoken narratives are interpreted to extract key story elements and transformed into evolving visual imagery, creating responsive visual aids that expand the audience experience of storytelling. Installed at Matchbox Gallery in 2022 and presented at Dome Fest West in 2024.

RAW Science Film Festival - Red Carpet / Portal | LOS ANGELES | 2020

Developed a spatial red carpet installation integrating architectural form with projected media and an immersive arrival sequence.

Ocaso Festival - Interactive Totems + Digital Wayfinding |

TAMARINDO | 2018

Designed interactive projected installations using Kinect sensors, Resolume, and VVVV; explored responsive digital wayfinding triggered by visitor movement and projected floor interfaces.
